8661 Bland Rd, Orange, TX 75956

CORE CAPABILITIES

- Abandoned and derelict vessel removal
- Submerged vessel recovery and refloating
- Marine lift-bag rigging and dewatering
- Hard-grounding and shallow-water recovery
- Emergency marine towing and casualty response
- Diver-supported recovery operations
- Pollution-conscious vessel stabilization and recovery
- Shore-side recovery, loading, transport and secure storage
- Heavy equipment support and debris/vessel removal logistics

PERSONNEL & QUALIFICATIONS

- 20+ years combined land and marine recovery experience
- USCG-licensed captains
- Multiple TWIC credentialed personnel
- Class A CDL drivers
- Experienced marine towing, salvage and heavy-recovery personnel

EQUIPMENT & RESOURCES

- Marine recovery/tow vessels including shallow-water jet propulsion capability
- Marine lift bags, pumps and dewatering equipment
- 50-ton rotating crane truck
- Kubota 95 skid steer
- Three 40-ft roll-off containers
- 53-ft Landoll trailer with Class A CDL capability
- Multiple 20-ft flatbed wreckers and medium-duty rollback recovery assets

CONTRACT READINESS

Target insurance structure aligned to vessel-removal contract requirements; coverage limits and endorsements verified per solicitation prior to representation.

- UEI: Pending SAM activation
- CAGE: Pending SAM activation
- Texas CMBL application submitted

REPRESENTATIVE PAST PERFORMANCE

30-ft Sun Tracker Pontoon | Toledo Bend Reservoir, Hemphill, TX

Recovered a vessel completely submerged in approximately 30 ft of water using divers, marine lift bags and recovery equipment. Vessel was raised, stabilized, towed to the ramp, loaded onto a medium-duty rollback wrecker and transported to secure storage.

17-ft Tracker | Lake Tawakoni, Quinlan, TX

Recovered a sunk/abandoned vessel in shallow water using lift bags and dewatering pumps while retaining onboard fuel/pollutants. Vessel was refloated, towed to the ramp, transported to secure storage and transferred for IAA retrieval.

22-ft MasterCraft Wake/Ski | Lake Sam Rayburn, Brookeland, TX

Recovered a vessel firmly grounded in hard clay using a jet-propulsion recovery vessel and pump-assisted extraction techniques, demonstrating specialized shallow-water ungrounding capability.

DIFFERENTIATORS

- Water-to-land recovery capability under one coordinated operation
- Marine salvage experience combined with established land-based heavy recovery
- Shallow-water and jet-propulsion recovery capability
- In-house towing, heavy recovery, roll-off, loading and transport assets
- 24/7 emergency response capability
- Ability to coordinate divers, recovery rigging, transportation, storage and disposal

TARGET WORK

- Abandoned & derelict vessel (ADV) removal
- Government vessel-removal solicitations
- Marine casualty and insurance recovery
- Storm/debris vessel recovery
- Submerged and grounded vessel removal
- Marine towing and emergency response
